**NCS IoT Kit**  
The Fastest and  
easiest way to create,  
develop and  
deploy IoT solutions

## Zolertia IoT Products

## NCS IoT Products

Long distance

Open Source

Raspberri Pi & Arduino compatible

Ultra low power consumption

## Zolertia Features

The zoul comprises the CC2538 and CC1200 in a single format, depending on the user or applications specific requirements, effectively allowing Internet of Things applications With multiband antenna. Also, the LiPo battery, Phidgets and Ziglet connectors, the controller with a robust 2.4Ghz IEEE 802.15.4 radio running up to with 512KB of flash and 32KB of RAM, bundled with a CC1200 868/915mhz RF transceiver. The zolertia devices uses contiki OS which is open source and to program the device we use C programming language.

NCS is the sole distributor of IoT Zolertia devices, Spain.

### Re-Mote:

Lightweight and powerful IoT hardware development platform enable any idea to be connected to the internet. [Zoul platform]

### Firefly:

It is a breakout board designed to inspire, build and develop any IoT Application with same feature of Re-Mote, [Zoul platform]

### n-Gateway:

Zigbee, Ethernet, WiFi compliant. And local database with MySQL.

## n-Mote

Mote allows the user to connect the sensor and can send sensor data wirelessly to another mote or nGate.

### Features:

- In-built Zigbee Compliant radio.
- Analog/Digital/I2C sensor interface.
- Operating voltage 5v.
- 16MHz clock frequency.
- 32KB flash memory.
- Secured communication.

## n-Gate

Gateway collects the data from n-mote and sends sensor data to the cloud using Ethernet [IEEE 802.3] or WiFi [IEEE802.11] protocol.

### Features:

- Zigbee radio inside.
- Ethernet/Wi-Fi compatible
- HDMI interface.
- 3 USB port.
- 1.2GHz Quad core ARM cortex processor.
- Local database storage of sensor data.
